

Air Bag System Quick Setup:

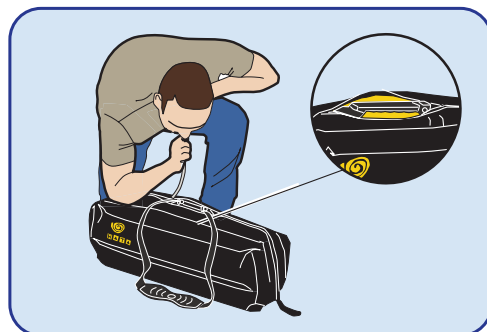

- 1.** Take air bag out of carrying pouch and unfold with the yellow side of the bag up.

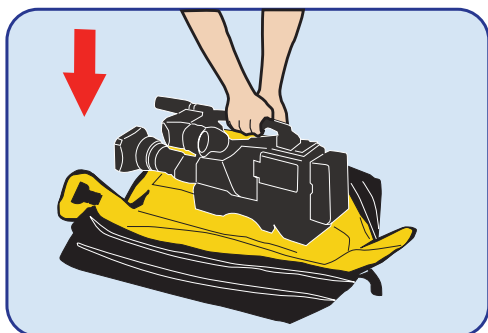

- 4.** Loosely close bag and slip the two top buckles

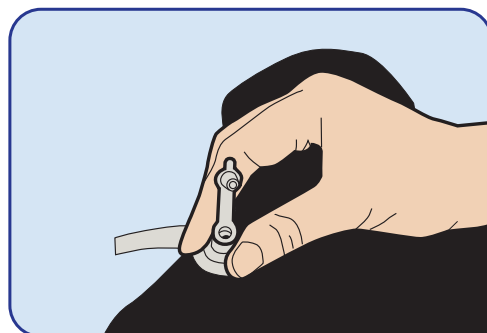

- 2.** Manually inflate air bag halfway using inflation tube.

- 5.** Zip bag up enough to leave either the camcorder handle or carrying strap accessible. Inflate to roughly **75%** capacity for flight.

- 3.** Place the camcorder inside of the bag taking note of the lens direction.

- 6. To Deflate**, open stopper on side flap of bag. Roll up bag to release air and fold neatly into carrying pouch.
